## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 5,440,479 to Hutton, as applied above, in view of U.S. Patent Number 5,056,029 to Cannon.

Hutton discloses the invention substantially as claimed. Hutton discloses a system and method for ordering products comprising a group of products (step 210, 220), means for a sender to select a object from the group (step 230) to be sent as a gift, means for inputting user and sender data (step 510) and for storing the data (step 520), means for assembling and packaging the gift, and means for sending the gift package to the recipient (column 1, lines 10-16).

However, Hutton does not disclose means for generating a gift card or a thank you acknowledgement. Cannon teaches a personalized message within a given product to be given as a gift in the analogous art of a system of ordering products for the purpose of sending a personalized message to accompany the gift. It would have been obvious to one with ordinary skill in the art at the time the invention was made to include a gift card and thank you acknowledgement with in the gift package in order to convey a message to the recipient by means of the gift.

Art Unit: 3676

Claims 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hutton and Cannon, as applied above, in view of the website [www.vitamingiftbasket.com](http://www.vitamingiftbasket.com).

Hutton and Cannon disclose the invention substantially as claimed. However, Hutton and Cannon do not disclose the group of products being health care products. Vitamin Gift Basket teaches of ordering and sending of a group of products which are health care products, including that of weight management, general nutritional support, anti-aging, vitamins and minerals in the analogous art of a system of ordering products for the purpose of contributing to the good health of others. It would have been obvious to one with ordinary skill in the art at the time the invention was made to offer vitamins as a group of products from the system and method disclosed by Hutton in order to contribute to the general health of friends and family.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to systems for ordering products:

U.S. Patent Number 5,235,509 to Mueller et al., U.S. Patent Number 5,036,472 to Buckley et al., U.S. Patent Number 4,797,818 to Cotter.
